AIM
E-SPORTS HEADSET

PROFESSIONAL QUALITY SOUND

AIM presents its headphones for e-sports and advanced gaming with professional-quality 7.1 surround sound and exceptional comfort.

Its unique 50mm neodymium drivers have been designed to provide the clearest and most pure sound without getting rid of bass sounds.

Not only will you get a full immersion in the game, but you will be able to locate any sound in the field, taking advantage of your rivals.

STUNNING RGB LIGHTING

The stunning DNA RGB lighting system of the AIM headset features 16.8 million colors and 4 modes with different effects. The design of these headphones offers a 360° illumination specially created to impress.

Instantly set up the lighting, volume and even 3D equalization of your headphones thanks to the control built into the cable. For full customization of the HD 7.1 surround system, AIM headphones include powerful software for Windows.

DETAILS MAKE THE DIFFERENCE

These headphones include a professional flexible microphone with an advanced noise filtering system and omnidirectional audio recording. You will be heard loud and clear!

The AIM headphones provide extreme comfort thanks to its lightweight suspension and soft cushions with perfect fit to the head and passive reduction of noise. These headphones are entirelly ergonomic to grant extended professional gaming sessions.

In addition, AIM ensures maximum strength, durability and perfect connection thanks to the ultra-resistant wire net, high-quality materials in aluminum and leather and its high quality.

What's your AIM? #gamelikeapro
