Highlights

Lumea prevents hair regrowth**

Philips Lumea uses an innovative light based technology called Intense Pulsed Light (IPL) to break the cycle of hair regrowth. Gentle pulses of light are applied at the root and, after several treatments, hair is prevented from growing back. IPL technology has been available in specialist salons since 1997. Philips Lumea, derived from this professional IPL technology, makes it possible for you to treat hair easily and effectively at home. Philips Lumea Prestige is the culmination of 14 years of research and development in collaboration with leading dermatologists.

Proven effectiveness

Objective studies show significant hair reduction in as little as 3 to 4 bi-weekly treatments, resulting in smooth, hair-free skin. To maintain results touch-up every 4 to 8 weeks. - To enlarge this picture, please click on the image in the image gallery on the top of this page.

Suitable hair and skin types

Philips Lumea Prestige works effectively, easily and safely on a wide variety of hair and skin types. It works on naturally dark blonde, brown and black colored hairs and on skin tones from very white to dark brown. As with other IPL based treatments, Philips Lumea cannot be used to treat white / grey, light blonde or red hair and is not suitable for very dark skin. This is due to the high contrast required between the pigment in hair color and pigment in the skin tone.

Treatment of body areas

Inspired by the uniqueness of each body area, Philips Lumea Prestige is the only IPL device to offer uniquely curved attachments designed for optimal results on different body areas. Attachments differ by combinations of shape, window size and filter. This Philips Lumea Prestige offers specialized treatment on body (legs, arms, stomach) and face (upper lip, chin), bikini and armpits.

Body attachment

Large, curved-in design to follow body contours thus effectively covering areas like legs, arms, stomach. Also, enables fast treatment on large body areas thanks to the largest treatment window (4.1 cm2 window size). 83% of women satisfied with hair reduction on legs.***

Face attachment

It has its own specially designed extra integrated filter and a small, flat window for gentle and precise use on upper lip, chin and jawline - 2 cm2 window size. 84% of women satisfied with hair reduction on face.***

SmartSkin sensor

Philips Lumea Prestige has 5 energy settings and makes it easy for you to choose the right one thanks to the Smart Skin sensor. The SmartSkin sensor advises the best setting for your skin tone, anytime you want.
