Highlights

HDMI Ethernet Channel (HEC)
Allows you to take full advantage of your Ethernet-enabled devices through an HDMI cable.

UHD 2160p
Supports video resolutions up to UHD 2160p. This enables your display to rival Digital Cinema systems used in movie theatres.

3D experience
Supports all 3D video formats, allowing true 3D home theater and gaming applications.

Audio Return Channel (ARC)
Allows an HDMI-connected TV with built-in tuner to send digital audio data to a surround audio system, eliminating the need for a separate audio cable.

24 carat gold-plated connector
24 carat gold-plated connectors ensure the best signal quality for your components.

Dielectric insulation
Superior insulation material separates the center conductor from the braided shield. By isolating the conductors, it maintains signal integrity, ensuring the best picture quality and optimum data transfer.

Triple shielding
Provides protection against outside noise and interference that can degrade signal clarity.

Metal shell
The metal shell protects the internal connection of the cable. It ensures durability and the reliability of your connection.

Flexible PVC Jacket
Flexible PVC jacket provided protection to the delicate core of the cable. It also offers extended durability and ease of installation.
