Highlights

Improves gingival health

The i InterCare brush head features extra-long, densely packed, high-quality bristles to target deep interdental plaque. It is clinically proven to reduce gingival bleeding and inflammation in just two weeks.

Clean and gum care mode

Whether you want to focus on removing plaque or on getting your gums healthy and keeping them that way, this brush has a mode for you: Clean mode delivers superior cleaning, while Gum Care mode adds an extra minute of reduced-power brushing, so you can gently massage your gums.

Safe and gentle

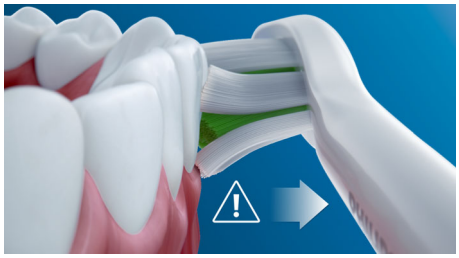

You can be sure of a safe brushing experience: our sonic technology is suitable for use with braces, fillings, crowns, and veneers, and helps prevent cavities and improve gum health.

Philips Sonicare technology

Philips Sonicare brush heads are vital to our core technology of high-frequency, high-amplitude brush movements performing over 31,000 brush strokes per minute. This dynamic cleaning action drives fluid deep between teeth and along the gumline, for a thorough yet gentle cleaning.

Too much pressure?

Patients may not notice if they are brushing too hard, but their toothbrush will. If patients start taking it out on their gums, the toothbrush will make a pulsing sound as a reminder to ease off on the pressure.

BrushSync technology

A microchip-enabled technology that detects and synchronizes the smart brush head with the smart handle. The smart handle and smart brush head pair is a powerful combination that enables Smart replacement reminders.

Smart replacement reminders

All brush heads wear out over time. But we've got that covered too: our smart brush-recognition technology tracks how long patients have been using their brush head for, and how hard they've been brushing. When it's time to replace it, a light on the handle lets them know. That way, they can be sure that their brush head is consistently doing a stellar job.

Helpful timers

Our QuadPacer lets you know when you've spent just the right amount of time cleaning each part of your mouth, while our Smartimer tells you when you've brushed for the recommended two minutes.

Easy-start program

Starting something new can take getting used to. That's why our easy-start program gives patients the option of a gradual, gentle increase in brushing power the first 14 times they use their new toothbrush.
