Simplicity of use

- Large buttons and big fonts for easy dialing and reading
- Radio music out loud on speakers
- High volume speaker for amplified sound
- Comfortable desktop docking station with charging function
- Digital still camera
- Dual SIM
- A dedicated button to turn on the flashlight

PHILIPS

Highlights

1600mAh battery
Your Philips mobile phone comes packed with a superb 1600mAh battery for your seamless connection on the go. With such long battery performance, you never have to worry about missing a work or family call.

2.4" QVGA display
Bright display 2.4 inches QVGA, resolution 240x320 pixels.

Big buttons and fonts

Your Philips mobile phone features large buttons with big printed fonts for dialing or texting by those with less dexterous fingers. And thanks to its big display fonts, you can now read the text on your screen comfortably without straining your eyes.

Play FM radio out loud

The inbuilt antenna and speaker function on your Philips mobile phone means that you do not always have to plug in your earphones when you want to listen to the radio. Now you can enjoy your favorite radio stations out loud or in your ears, depending on your mood or circumstance.

High volume speaker

With a high volume speaker, your phone can be set to emit a louder-than-normal ringtone if necessary. You will not have to worry about missing important calls, especially over ambient sounds at home or loud competing noises on the go. You can also opt to enjoy your favorite FM radio programs and music over a greater volume when it suits you.

Charging cradle dock
For your convenience, the kit comes with a docking station with a charging function - using a rubberized sole, the docking station will stand confidently on a table, bedside table or other place where it will be convenient for you. Thanks to the cavity, which plays the role of a kind of "speaker", the volume of the bell is increased - it's almost impossible to miss an incoming call!

Dual-SIM
The phone supports the use of two SIM cards. This is a useful option that allows you to choose the most convenient rates and save on mobile communication.

Digital still camera
The integrated digital camera allows you to capture precious moments of your life.

Dedicated flashlight button
If you do not like being left in the dark, the flashlight button feature on your mobile phone is perfect for you. Your Philips phone is transformed into a handy compact flashlight even when the phone is turned off, just by toggling the dedicated switch. Keep it right by your side at all times, and you'll never have to grope your way around in the dark again.
