Comfortable DECT Big button phone

MEDION® LIFE® E63197 (MD 43564)

Full ECO Funktion

ECO Funktion

Main Features

Full-ECO-Funktion – 100% radiation reduction

ECO function for handset – particularly environmentally-friendly thanks to distance-dependent[1] radiation reduction during telephone conversations.

Compatible with hearing aids

LED indication – visual signal for new received call

20 phonebook entries – comfortably save personal contacts on the telephone to enable a fast search

Displays the last 10 missed calls – with automatic name display if the caller's number is stored in the phone book

LCD Display with amber-colored backlight – absolute ease of use thanks to the clear display of the name[2] and telephone number

High-performance NiMH battery – up to 10 hours of calls on just a single battery charge or 100 hours in standby mode

Large, user-friendly buttons – for comfortable dialing and easy navigation through the menus for the whole family

Convenient hands-free function on the handset – for comfortable, hands-free calls, which makes it significantly easier to take notes while you listen in to the conversation

1 Distance between base station and handset
2 Only when the contact is stored in the telephone book and the call number is not suppressed.
3 Only with several handsets
