NGS ALARM CLOCK SUNRISE HIT

ALARM CLOCK - FM RADIO SNOOZE - AC220V/60HZ

Make your mornings less tough, combining essential bedside features with clear sound, all in a compact design.

NGS Sunrise Hit, a **digital alarm clock radio** is ideal for everyday use, from the **blue LED display** to the easy-to-use button controls that adjust volume, seek radio stations, and program the alarm.

The large 0.6" LED display enables easy readability of the content on the screen. Now you can read the time and alarm easily, even from a distance.

Wake up to the traditional built-in buzzer or your favorite AM/FM radio station. Simply set the alarm on your NGS Sunrise Hit radio to wake you with the radio station you last listened to or choose to wake up with a tone alarm.
When the wake up time is reached, the radio will automatically turn on that radio station or trigger the buzzer to sound.

NGS Sunrise Hit enables you to quickly **select up to 20 stations of your choice (10FM/10AM)**. Just tune into the station that you want to preset, press and hold the preset button to memorize the frequency.

With preset radio stations that can be stored, you can quickly access your favorite radio station without having to manually tune the frequencies each time. FM 88-108 MHz & AM 522-1620 kHz

The digital alarm clock radio comes with Dual alarm capability, this feature allows two alarm configurations to be set for different times.

The Sleep timer function lets you decide how long you want to listen to music or a radio station before falling asleep. With the Sleep Button, you can put your radio into standby after a set time period.

NGS Sunrise Hit will continue to play for the selected duration (90, 80, 70, 60, 50,40, 30, 20, 10 min) and then automatically will switch off.

If you want to sleep a little bit longer, the alarm clock radio has also a snooze feature. Should the alarm ring and you wish to continue sleeping, simply press the Snooze button once and go back to sleep. Nine minutes later the alarm will ring again.

You can continue to press the Snooze button every nine minutes until you press the POWER button to turn the alarm off definitively.

The radio works either with AC power supply or with 2 AAA batteries (not included).

Furthermore, in case of a power failure, the alarm clock radio has a battery backup system (DC 1x CR2032) that maintains time and alarm settings.
