- Up to 5000 cups* without descaling thanks to AquaClean

*Based on 8 filter replacements as indicated by the machine. Actual number of cups depends on selected coffee varieties, rinsing and cleaning patterns.
***Based on 70-82°C
****not included in box contents

Highlights

4 aromatic coffees

Enjoy your favourite coffees for your special moments. Whether you're craving an espresso, a coffee or a milk-based recipe, your fully automatic machine delivers a perfect in-cup result with no hassle and in no time!

Classic milk frother

The Classic Milk Frother dispenses steam, allowing you to easily prepare silky smooth milk froth for your cappuccino. What's more? With only two parts, the Classic Milk Frother is also easy to clean.

Intuitive touch display

The irresistible taste and aroma of coffee from fresh beans is just one touch away. Our intuitive touch display allows you to easily select your favourite coffee.

My Coffee Choice

Adjust the strength and quantity of your beverage with the My Coffee Choice menu. Easily choose from three different settings to suit your preferences.

12-step grinder adjustment

Our durable ceramic grinders can be adjusted in 12 steps, so you can turn your beans into anything from ultra-fine powder to coarse grindings.

Perfect temperature and aroma

The Aroma Extract system intelligently strikes the optimum balance between brewing temperature and aroma extraction by keeping the water temperature between 90 and 98°C, while regulating the water flow rate, so you can enjoy delicious coffees.

100% ceramic grinders

Bring out the full flavour of your coffee with our hard-wearing ceramic grinder. Our sharp-edged grinders extract the best aroma and flavour from your beans. Made from 100% ceramic material which ensures that they last for at least 20.000 cups.

Preserve beans' aroma

The new Aroma seal protects your favourite coffee beans and makes sure they preserve their original aroma over time, while reducing the grinder noise.

Removable brew group

The brew group is the heart of every bean-to-cup coffee machine and should be cleaned regularly. The removable brew group allows you to clean it thoroughly just by rinsing it under the tap.

Specifications

Energy efficiency

Standby mode power consumption: 0.2 W
Off mode power consumption: n/a
Networked standby mode power consumption: n/a
Period before automatic switching into standby mode: 30 min
Measurement standard: EN 50564:2011
