7 Port USB 3.0 hub and charger

Sevenfold performance

If all USB 3.0 ports are occupied, but you need the data from the USB stick urgently, this candidate could be very helpful. A USB 3.0 port on your computer is expanded into seven additional USB ports and they can be placed in more accessible locations, like your desk. Furthermore, all USB ports comply with the battery charging specification (BC 1.2) to quickly recharge mobile devices.

Sevenfold saving

All ports can be switched on and off individually during operation without interrupting the function of the other ports. As a result, a considerable amount of electricity can be saved in the long term.

Really friendly

Due to the use of aluminium as a light, good-looking material, the IB-HUB1701-U3 is always nice to look at and at the same time robust enough, if something goes rough.
