HAPPY PLUGS AIR 1 USER MANUAL

DEAR CUSTOMER

Even before we started working on this product we thought of it as a companion piece to our previous wireless products, a sequel of sorts - The next chapter.

We knew it had to be special so we worked hard. And then we worked even harder. Sharing this journey with you all has been the gift of a lifetime and I hope you can see and experience our gratitude within this product. Thank you!

Best Regards,

Andreas Vural, founder of Happy Plugs

CONNECT AND USE

1. Activate Bluetooth on your phone or device.
2. Remove the Air 1 earbuds from the charge case, and select *"Air 1 by Happy Plugs"* on your phone/device to pair. Keep the earbuds within 20 cm / 7 inches apart from each other.
3. Insert the Air 1 earbuds into your ears. Adjust the angle to find your perfect fit.

When inserting the Air 1 into your ears - make sure not to touch the touch control surface. A four second touch turns the earbud off.

CHARGING THE CASE

Charge your Air 1 case by connecting the included Micro-USB cable to a USB power source. When the Air 1 case LED is turned on, the case is charging. When the light turns off your Air 1 case is fully charged.

CHARGING THE EARBUDS

To charge the Air 1 earbuds place them in the charging case. When the Air 1 earbud LED is turned on, the earbud is charging. Once the lights turns off you Air 1 earbud is fully charged.

LED GUIDE

The Air 1 earbuds & case LEDs are lit up while charging. When fully charged the light turns off. When removing the Air 1 from the case, the earbuds' LED will blink slowly while pairing to your bluetooth source and blink fast while connecting to each other.

CALLS

Using the Air 1 for phone calls, both earbuds are active, but only the right (R) earbud has dual microphones. This means that you need to use the right (R) earbud when using just one earbud for phone calls.

To get the most out of your new Air 1 when used together with an Apple Device; while your Air 1 is paired go into *Settings* > *General* > *Accessibility,* scroll down to *Call Audio Routing* and select *Bluetooth Headset*.

TOUCH CONTROLS

Both earbuds have a touch sensor (see illustration). Tap it with your finger to control your calls and music according to the guide.

SIRI OR GOOGLE ASSISTANT

Control your calls and music with Siri or Google Assistant by pressing 2 sec on right (R) earbud.

To use Siri on your iPhone while it is locked, go into *Settings* > *Touch ID & Passcode,* scroll down to *Allow Access when locked* and enable Siri.

RESET TO FACTORY SETTINGS

If you need to reset your earbuds and terminate any previous bluetooth pairing:

1. Delete Air 1 by Happy Plugs from your Bluetooth devices list.
2. Make sure the charge case is charged. Put the Earphones in the charge case.
3. Touch and hold the touch sensors on both left and right earphones for 10 seconds until the earphone LEDs blink 3 times.
4. Take the earphones out from the charge case and hold them close together (within 10 cm) until the LED on the left earphone stops blinking.
5. Connect to your Device.
