Passive DisplayPort to DVI-D video converters are low cost, simple solutions for converting DisplayPort video signals to a DVI-D video output and connecting an additional display for an enhanced multi-screen experience.

The Lindy DisplayPort to DVI Converter connects DisplayPort equipped source such as desktop PCs or laptops to a DVI display or projector. High definition video resolutions up to 1920x1080@60Hz / 1920x1200@60Hz are supported. This device can be used in static environments where PCs or media consoles have been upgraded to modern devices but are connected to older displays and projectors that require a DVI connection.

This converter can also be used to extend or mirror the desktop display to increase productivity in the workplace or home. Internal copper shielding provides enhanced reliability and compatibility. Due to its compact size and lightweight form factor the converter makes the perfect travel accessory for use with laptops, notebooks and ultrabooks to connect to DVI displays or projectors, perfect for BYOD work environments. The converter supports plug and play installation ensuring hassle-free setup.
