THANK YOU FOR BUYING A HOTPOINT PRODUCT
In order to receive a more complete assistance, please register your product on **www.hotpoint.eu/register**

Before using the appliance carefully read the Safety Instruction.

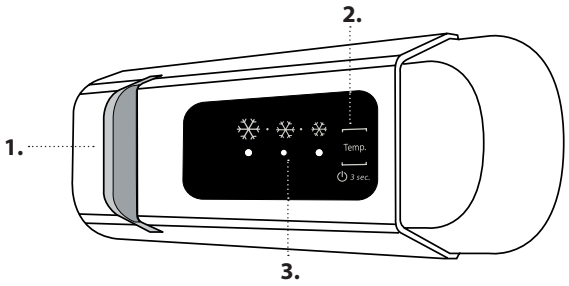

PRODUCT DESCRIPTION

FIRST TIME USE

Wait at least two hours, after the installation, before connecting the appliance to the power supply. Connect the appliance to the power supply it starts the operation automatically. The ideal storage temperatures for the food are preset in the factory.

After turning the appliance on, you must wait for 4-6 hours for the correct storage temperature to be reached for a normally filled appliance. Position the antibacterial anti-odour filter in the fan as demonstrated in the filter packaging (if available). If the audible signal sounds, it means that the temperature alarm has intervened: press the button to switch off the acoustic alarms.

CONTROL PANEL

1. LED Light
2. On/Stand-by
3. Freezer and refrigerator compartment temperature button

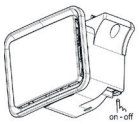

ON/STAND-BY

Press the button for 3 seconds to turn the appliance off. In Stand-by mode the light in the refrigerator compartment does not turn on. Press the button again briefly to reactivate the appliance.

Note: this does not disconnect the appliance from the power supply.

FAN*

The Fan improves temperature distribution inside the product, allowing better preservation of stored food and reduction of excess humidity.
You can turn the fan on/off by pressing the button on the base (as shown in the figure). If the ambient temperature exceeds 27°C, or if drops of water are present on the glass shelves, it is essential that the fan is on to ensure the proper preservation of the food. Deactivation of the fan allows energy consumption to be optimised.

FREEZER AND REFRIGERATOR COMPARTMENT TEMPERATURE

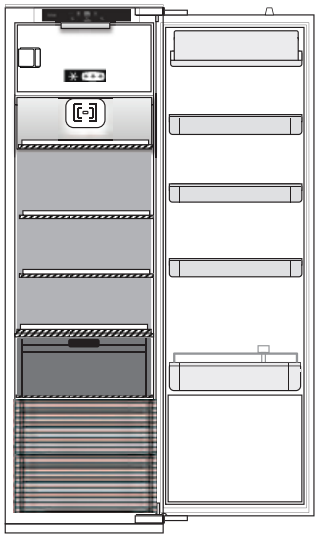

The three LED indicators indicate the refrigerator compartment set temperature. It is possible to set a different temperature of the appliance with the button.

The following adjustments are possible:

LEDs lit	Set temperature
	High (less cold)
	Medium-high
	Medium
	Medium-low
	Low (colder)
	Fast cool

HOW TO STORE FOOD AND BEVERAGE

** For models with "0 ° ZONE" COMPARTMENT the "coolest area" is the one highlighted in the legend

Legend

TEMPERATE ZONE
Suggested for storage of tropical fruit, cans, drink, eggs, sauces, pickles, butter, jam

COOL ZONE
Suggested for storage of cheese, milk, daily food, delicatessen, yoghurt

COOLEST AREA
Suggested for storage of cold cuts, desserts, meat and fish

FRUIT & VEGETABLE DRAWER

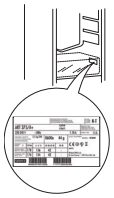

* Available only on certain models

TROUBLESHOOTING

What to do if...	Possible reasons	Solutions
The control panel is switched off, the appliance does not work.	There may be an appliance power supply problem.	Check that: • there is not a power outage; • the plug is properly inserted in the socket and any bipolar power switch is in the correct position (this enables the power supply to the appliance); • the household electrical system protection devices are efficient; • the power cable is not damaged.
	The appliance could be in On/stand by mode.	Turn the appliance on by briefly pressing the ⏻ button (see On/Stand-by function).
The inside light does not work.	The light may need to be replace. Malfunction of a technical component.	Disconnect the appliance from the power supply and contact the Technical Assistance Service if you need a replacement.
The inside light flashes.	Door alarm active. It is activated when the refrigerator compartment door remains open for a prolonged period of time.	To stop the alarm, close the refrigerator door. On reopening the door, check the light works.
The temperature inside the compartments is not low enough.	There could be various causes (see “Solutions”).	Check that: • the door closes properly; • the appliance is not installed near a heat source; • the set temperature is adequate; • the circulation of air through the vents at the bottom of the appliance is not obstructed (see installation section).
There is water on the bottom of the refrigerator compartment.	The defrost water drain is blocked.	Clean the defrosting water drain (see section “Cleaning and Maintenance").
Excessive amount of frost in the freezer compartment.	The door to the freezer compartment is not closed properly.	Check that there is nothing preventing the door from closing properly. • Defrost the freezer compartment. • Make sure the appliance has been correctly installed.
The front edge of the appliance that the door gaskets seal against is hot.	This is not a defect. It prevents condensation from forming.	No solution is necessary.
One or more green symbols are flashing continuously and it is not possible to change the temperature set.	Malfunction alarm. The alarm indicates a fault in a technical component.	Contact Technical Assistance Service.
The temperature of the refrigerator compartment is too cold.	• The set temperature is too cold. • A large amount of fresh food may have been placed in the freezer compartment.	• Try to set a less cold temperature. • If fresh food has been placed in the freezer compartment, wait until it has fully frozen. • Turn off the fan (if present) following the procedure described in the paragraph “FAN”.
