

BUSINESS DEVICES THAT ARE A CLASS APART

ThinkBook combines the style and user experience of consumer devices with the security and business-class support of ThinkPad.

ThinkBook 13s IML

Smarter technology for all

Lenovo

Workplace devices need to meet the desires of today's young workforce. This ultraslim has the same business-class warranty and support services as ThinkPad, but features a sleek aluminium body that looks more like a premium consumer laptop. Those used to working on smartphones will appreciate Smart Power On; this replaces the power button with a fingerprint sensor, enabling users to instantly switch on the device and log in at the same time.

REASONS TO BUY

The display has an ultra-narrow border, maximizing screen space and enabling a more compact design. HARMAN speakers with Dolby® Audio™ deliver amazing sound clarity from such a slim design.

Productivity boosting features include dedicated Skype Hot Keys to simplify making and receiving calls online, and Modern Standby technology which downloads emails, app updates and Skype call alerts even with the laptop lid closed.

Minimal preloaded applications mean maximum battery life and responsiveness for users, and faster deployment for IT admins.

ThinkBook 13s IML
