Highlights

The original Philips filter

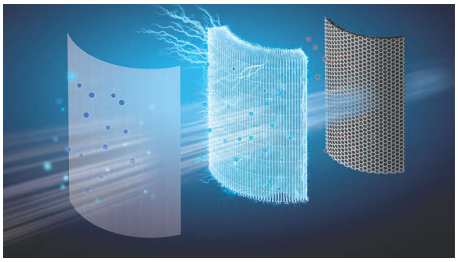

Genuine Philips filter was designed together with the device itself to ensure a perfect fit, which guarantees the continuously smooth operation of the device.

Quality you can trust

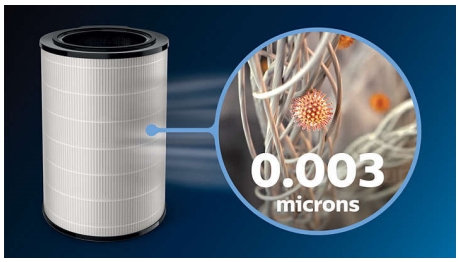

Philips air filters go through a set of mandatory and strict inspection tests before they are released from the factory. They are subjected to rigorous life and durability tests, for continuous operation 24/7. Our filters are designed to ensure that your Philips purifier performs at its best right up to the end of the filter's lifespan.

3-in-1 effortless convenience

The cylindrical 3-in-1 filter combines three layers of filtration to keep your device running like on day one.(6) Our Active Carbon, HEPA and pre-filter are the optimal combination to remove pollutants, viruses, allergens and bacteria. To make sure that you breathe cleaner air, we recommend changing all three filters at once.

Superior performance

A 3-layer filtration with NanoProtect HEPA, active carbon and pre-filter makes sure that you are protected from bacteria, pollen, dust, PM2.5, pet dander and gases. The NanoProtect HEPA technology not only captures pollutants, but it uses a special electrostatic charge to attract them, enabling it to purify the air faster than the HEPA H13 filter, which is used for medical applications. (5)

Long-lasting performance

Philips integrated 3-in-1 filter provides consistent protection and guarantees optimal filtration for up to 12 months. (1)

Up to 99.9% virus removal

The purifier captures aerosols including those which may contain respiratory viruses. Tested independently to remove up to 99.9% of viruses and aerosols from the air. Also tested for coronavirus (8).

Easy to clean pre-filter

For optimal filtration performance, regularly vacuum-clean the pre-filter.

Effortless maintenance

Your Philips device notifies you when to clean your pre-filter and when to replace the filter. This takes less than a minute. Maintenance of the device is effortless, ensuring that you always enjoy clean, healthy air.

* (1) Recommended lifetime is calculated based on the Philips user's average usage time and the WHO urban outdoor pollution level data. Actual lifetime is impacted by usage environments and frequencies.
* (2) Only applicable for selected models with connectivity
* (3) Only applicable in those countries where the Philips shop is available
* (4) NanoProtect HEPA filter material provides lower air flow resistance than the material from a HEPA H13 filter, enabling a Philips air purifier with NanoProtect to deliver a higher Clean Air Delivery Rate (CADR) than with an equivalently sized certified HEPA H13 filter.
* (5) From the air that passes through the filter, tested with NaCl aerosol by iUTA according to DIN71460-1.
* (6) Contingent on the filter being used with AC1711 or 1715 Philips purifier
* (7) Microbial Reduction Rate Test conducted at Airmid Health group Ltd. tested in a 28.5m³ test chamber contaminated with airborne influenza A(H1N1).
* (8) Microbial Reduction Rate Test at external lab, in a test chamber contaminated with avian coronavirus (IBV) aerosols, with Philips HEPA NanoProtect filter.
