- Cable storage compartment for easy placement in your kitchen
- Direct automatic shut-off for energy saving and safety
- A water level indication for easy filling

*Coffee remains at least 65°C after 2 hours

Highlights

Stainless steel thermal jug

This premium, unbreakable stainless steel thermal jug maintains the full aroma and temperature for more than 2 hours. Thanks to its double-wall design, the coffee is at least 65°C after 2 hours.

Smart lock on thermal jug

The thermal jug is equipped with a smart lock that can easily be operated. The lock ensures the aroma and temperature are fully preserved when the jug is taken out of the coffee maker.

Timer

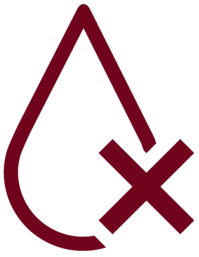

Wake up to the smell of fresh coffee thanks to the timer. Prepare your coffee maker, set the time and a fresh jug of coffee is brewed at the time you choose.

Rich coffee flavour

Thanks to the concentrated water flow that is poured onto the coffee bed, optimal flavours are extracted from the coffee grounds.

Drip stop

The drip stop allows you to pour a cup of coffee before the full brewing cycle is finished.

Cable storage compartment

Spare cable can be stored very easily in the cable compartment at the back of the coffee maker. This means that the coffee maker can be positioned nicely in your kitchen.

Direct automatic shut-off

After brewing your coffee, the coffee maker switches off automatically for energy-saving and safety reasons. The thermal jug will ensure that the coffee stays hot.

Water level indication

Fill the water tank easily and precisely with the water level indication.

Specifications

Service

2 year guarantee: Yes

General specifications

Ease of cleaning and maintenance: Dishwasher-safe parts, Removable filter holder
Ease of use and comfort: Water level indication, Automatic shut-off, Drip stop, Display, Preset timer
Suitable for: Ground coffee powder
Coffee drinks: Drip filter coffee

Technical Specifications

Capacity water tank: 8–12 cups, 1.2 l
Brewing time for a jug: 10 minute(s)
