NGS SMART WIFI PLUG LOOP TRACK

16A MAX - ENERGY MONITORING FUNCTION - SCHEDULES & TIMERS

Its **2,4GHz WIFI technology and 3680W (16A)** output power make possible to manage easily the most intelligent and powerful devices of your home. All this using the IEEE 802.11b/g/n wifi protocol which enables to automatically perform household tasks through the free app "NGS ORB" on your Smartphone or Tablet. It also supports a rated voltage of **100-240V AC at 50/60Hz.**

- **Unlimited**. Not all smart sockets of the market feature 16A rated current as NGS loop, therefore this smart plug is able to connect to any type of device, including the most powerful ones of your home.

- **Measures the real-time power consumptio**n of the connected device, this info can be analyzed directly in the application. You will know exactly how many kW each device connected to the NGS Loop Track consumes and hours when you consume the most. With all this information you will know if the energetic rate you have contracted is the most adequate.

- **Carefree**. Turn off, turn on, program... Has never been this easy. Control the use of your energy in the most efficient way, program your devices and in case of doubt check that you never leave anything on. Save energy, thus creating together an easier and sustainable world.

- **Remote access**. You have the power. No matter the time or place, either from the sofa at home or from the street, you will be able to control everything. Even you can monitor the activity of the little ones on the net, always in the most comfortable way with just one click.

- **Make the most of your daily life**. Use it every day, set at what time your day begins by making the lights go out at dawn, programming your morning coffee so it's warm and don't miss a second. Everything is possible, why not?

- **We look after your safety**. This product complies with the GDPR (General Data Protection Regulations). The European Regulation on the protection of natural persons regarding to the processing of their personal data and the free movement of such data.

Intelligent on the inside but... what about the outside? Its small size **50 x 50 x 83mm**, thanks to which you can connect several of them in the same strip, and its minimalist design make NGS Loop ideal for any type of home, adapting without any problems to all types of furnishings and decor.

Not only is compatible with any iOS version 8 (or above) device, but also it works with Android version 4.1 (or above) devices. You can also synchronize it with the **IFTTT** account and create endless actions. But... why not simplify it even more? Let **Amazon Alexa or Google Assistant** control your devices for you.

Technical specifications

- Controlled via APP or Amazon & Google Voice Assistant
- Connectivity: IEEE 802.11 b/g /n 2.4G Hz
- Rated voltage: 100-240V AC 50/ 60Hz
- Rated current: 16A (max)
- Maximum total power output: 3680W

Package Contents

- LoopTrack
- User's manual
- 2 years warranty card
