## DANUBE KAMP WHITE

The new Danube Kamp PC case conveys sobriety at first glance, but with a touch of color and modernity when the three front ARGB ring fans start to spin.

It has a resounding and forceful design, with straight lines that will be broken when the front grille reveals the 3 front fans.

It is a chassis with a special width (230 mm) that allows mounting characteristic equipment with large components.

It has ample space to house liquid cooling, up to 6 fans, and space for 350mm graphics cards: total freedom for multiple configurations and later expansions.

Through the tempered glass side panel you will have a clear view of the internal components of your setup.
