— CHICCO NURSING —

We know that the first 36 months of a child's life is a special time, full of moments that can never be replicated.
This is why for 60 years we have put our passion and expertise to use day after day to support parents and make sure that every single one of those moments can be completely enjoyed.

CHICCO'S WAY
A UNIQUE PASSION.

WE IMMERSE OURSELVES IN A CHILD'S WORLD EVERY SINGLE DAY.
WE PUT PASSION AND DEDICATION INTO EVERYTHING WE DO IN ORDER TO GIVE MOTHERS EXTRA LITTLE MOMENTS OF SERENITY IN THEIR HECTIC EVERYDAY LIVES.
WE COMMUNICATE THIS APPROACH THROUGH OUR VALUES, OUR PERSONALITY AND OUR OWN UNIQUE WAY OF EXPRESSING IT, WHICH WE CALL **"CHICCO'S WAY"**.

WORKING IN HARMONY WITH PARENTS.

We listen to the needs and emotions of parents and children. We understand them, we make them our own, and we have made it our mission to provide the best solutions for them.
We know how and when to be there for them, working together in perfect harmony but without ever taking their place.
This is what we call: CLOSENESS.

THE RIGHT SOLUTION GUARANTEED.

We take what we do extremely seriously.
We take care to ensure that our products are safe, reliable and meet high quality standards.
We have over 50 years' experience in the world of baby care and we continue to build on this expertise through our work at the Chicco Baby Research Center.
This is what we call: PROFESSIONALISM AND EXPERTISE.

COSTANTLY EVOLVING.

We are backed by a strong sense of tradition, yet our team is constantly looking towards the future to research the most technologically advanced solutions to respond to the needs of parents and children, both now and in the future.
This is what we call: INNOVATION AND CONTEMPORANEITY.

ALWAYS WITH A SMILE.

Taking care of a child is a serious business.
We know this but think that it is equally important to relax a little every now and then.
Because the experience of being a parent is by very definition a happy and positive one too.
Our products are simple and straightforward
– it is instantly recognisable what they are.
They are the ultimate in user-friendliness.
The language we use is also designed to be plain-speaking yet raise a smile at the same time.
This is what we call: SMARTNESS.

OSSERVATORIO CHICCO
BABY RESEARCH CENTER

Chicco's vast experience in the infant world has now been consolidated by an Observatory facility, dedicated to increasing our knowledge of children of from 0 to 3 years of age and their psycho-physical, emotional and social needs. The first few years are a vital period for the growth of all children, a period which is full of significant changes and physical and psychological needs, for them and their families. Only by observing all these aspects very closely, and in particular the spontaneous behaviour of children, we are able to fully comprehend their actual needs. This is why the Osservatorio collaborates with experts in the medical-scientific world, which is vital in order to keep up to date with the knowledge and progress made in the pediatric field, and to assess the scientific value of the proposed products; it communicates with the education facilities and constantly gathers suggestions from mothers and fathers, those who have hands-on experience of what their child need. The commitment of the Osservatorio is to gain as much knowledge as possible on the world of children, and use it to devise and develop specific solutions for each growth phase.

KNOW-HOW

Constant observation of children and the world they live in.

SCIENTIFICITY

Collaboration with the medical world.

EXPERIENCE

Ongoing dialogue with parents.

RESPONSIBILITY

Because the happiness of children is a serious issue.

BREAST PADS

MAXIMUM SAFETY
FOR THE DELICATE SKIN OF BREAST

EAN CODE 8003670989257

EAN CODE 8003670845843

EFFECTIVENESS APPROVED*

Maximum safety and delicacy for the breast skin.
The effectiveness study highlighted that by using the Breast Pads with antibacterial, there were no irritations or rhagades in 80% of cases, no mastitis and it took less time to solve problems in comparison to traditional pads.
The product was also judged positively by mothers involved in terms of absorbency, breathability and dry feeling.

WHY CHOOSE:

BREATHABLE

Invisible
under clothes.

SURFACE DRY

Leak proof,
ensuring dry skin.

DERMATOLOGICALLY TESTED

*Study performed by the Ospedale Maggiore Policlinico Mangiagalli e Regina Elena in Milan on a sample of 90 mothers who were breastfeeding, 2007.

SKINTOSKIN NIPPLE SHIELDS

They allow maximum contact skin to skin: they are the only ones with low sides to ensure baby's chin and nose contact with mother's breast.
Elongated shape grants the maximum grip and fit to the breast.
Thanks to the soft and very thin silicone, they adhere perfectly and ensure an optimal fit.
Special embossed areas on the edges: they help to put on and remove the shields in a correct and comfortable way.
Slightly flattened teat, designed to ensure a natural latch on the nipple. Special cuts allow the milk to flow naturally and continuously without stagnation.
The practical case can be sterilized in a gesture together with the shields.

REF 00009033000000 (S-M)
Inner box 6 pcs

EAN CODE 8058664070473

Two nipple shields
sterilisation in one step.

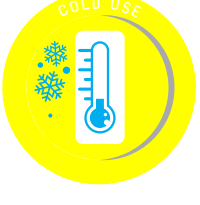

THERMOGEL BREAST PADS

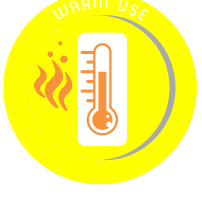

Hot & Cold therapy to help mum overcome common breastfeeding issues.
Cold Therapy: relieves redness due to engorgement, swelling and pain.
Hot Therapy: relieves mastitis, plugged ducts and encourages milk let-down. Ideal to be used before nursing to soften the breast.
Breast Pump Aid: used warm to encourage milk flow and fasten the time spent expressing.
Special design to fit to the breast shape: flexible and soft.
Extra cover made in soft fabric, to be gentle on delicate breast skin.

REF 00008043000000
Inner box 4 pcs

EAN CODE 8058664069958

2 In 1: warm & cold therapy.

*Kills 99,9% of harmful household germs.

HYDROGEL SOOTHING PADS

Reduce pain and promote rapid healing.
Water-based, refresh and moisturize the skin, giving instant relief.
Thin and smooth, apply and remove easily.

REF 00002256100000
Inner box 4 pcs

EAN CODE 8058664070459

BREAST SHELLS

Protect nipples and collect every drop of milk.
Soft silicone cover, that gently fits the shape of the breast, ensures maximum comfort, helps the extroversion of flat nipples and reduces breast engorgement.
Holes: help air circulate, keep skin dry and help relieve sore or cracked nipples, supporting healing.

REF 00002258000000
Inner box 6 pcs

EAN CODE 8003670916659

BREAST WIPES

Moisturize and protect skin's natural defences.
Vitamin E and Glycerine: they nourish and hydrate the skin.
Contains prebiotic active that preserves and strengthens good microflora for protection, safety and effectiveness.
Usable both before and after feeding.
Absolutely tasteless, there is no need to rinse the breast.
O% Parabens, Phenoxyethanol, Alcohol and Fragrances.

PERFECT 5

0+

2+

4+

PERFECT 5 is the innovative BIOFUNCTIONAL bottle developed to better support baby's nutrition, adapting immediately and continuosly to the individual way baby's sucking.

HYGIENIC SILICONE 100% SOFT SENSE

PHYSIO TEAT for an ideal latch

intui-flow SYSTEM

Thanks to the revolutionary intui-flow™ System, it adapts to the unique feeding needs of every baby, supporting all the important feeding variables for an **INTUITIVE** and **PHYSIOLOGICAL** nutrition

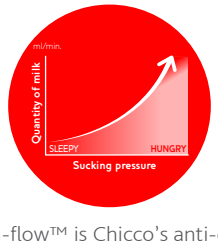

WHY CHOOSE:

INTUI-FLOW™ SYSTEM

Thanks to the combine work or the Equilibrium Membrane and Physio Teat gives every baby all the important things for **perfect comfort and intuitive and physiological nutrition.**

BABY TAILORED

intui-flow™ is Chicco's anti-colic system, designed to support the **physiological sucking rhythm of each baby**, so that they feelsatisfied and relaxed during and after feeding.

INNOVATION AT SERVICE

The exclusive **Equilibrium Membrane**, at the base of the bottle, regulates the passage of air, adapting immediately and continuously to the intensity of baby's sucking, for maximum comfort.

0+

2+

4+

PERFECT 5

PERFECT 5 ticks all the boxes for peace of tummy and peace of mind, thanks to its innovative, patent pending intui-flow System.

OSSERVATORIO CHICCO
BABY RESEARCH CENTER

PHYSIO TEAT

EQUILIBRIUM MEMBRANE

intui-flow™ SYSTEM

Regulates the important variables during the feed:

1 PROVEN ANTI-COLIC EFFECT
The back-ventilated Equilibrium Membrane system and the Physio teat prevent ingesting air, thus reducing irritability, regurgitation and colic.*

2 PHYSIOLOGICAL SUCKING RHYTHM
It follows your baby's unique and natural sucking rhythm to allow constant and regular feeding, without interruptions or breathlessness. CLINICALLY TESTED**

3 PERFECT LATCH
The teat adapts perfectly to the mouth of the baby and aids the natural way of sucking. Accepted by 9 out of 10 babies.*

4 SOFT SENSE SILICONE
The soft and elastic teat with Soft Sense finish gives your baby a pleasant and natural feeling.

5 MAXIMUM HYGIENE AND EASE OF CLEANING
The unscrewable base makes cleaning the bottle easy and fast in every part.

* Consumer test on 450 children in Italy, 2019
** Clinical study on 30 children of the Campus Bio-Medico University of Rome, 2019

PERFECT 5

PHYSIO TEAT

Interchangeable Physio teats to follow baby's growth with 4 different flow rates.
Available in Soft Sense silicone.

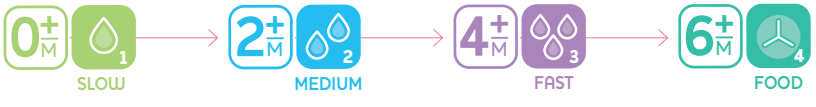

TEAT ACCEPTANCE
Accepted by 9 out of 10 babies*

EASY SUCKING
To promote the natural peristaltic suckling action

SOFT SENSE SILICONE

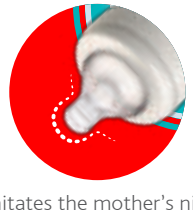

SYMMETRICAL, ELONGATED AND FLATTENED SHAPE
For an ideal latch

WHY CHOOSE:

SYMMETRICAL, ELONGATED AND FLATTENED SHAPE

It imitates the mother's nipple reshaped by the baby's sucking: elongated and widened to promote the natural peristaltic suckling action, a perfect seal and latch, easy acceptance and ease of sucking.

SOFT SENSE SILICONE

The special finish gives the teat a velvety and soft feel resembling mother's skin for even more natural and comfortable sucking.

COMPA... WELL-BEING BOT...

The ANTI-COLIC VALVE at the base of the teat makes it compatible with Well-Being bottles to prevent teat collapse and air intake, thus reducing colic and regurgitation, enabling smooth, relaxed feeding.

* Consumer test on 450 children in Italy, 2019

SOOTHING

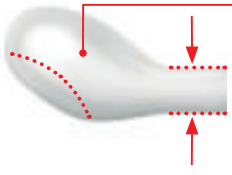

PHYSIOFORMA

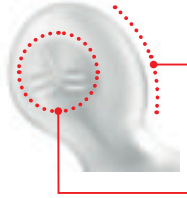

AN ACTIVE PHYSIOLOGICAL SHAPE.

PhysioForma® is the exclusive shape that encourages the correct and harmonious development of the mouth and that supports baby's physiological breathing, which is fundamental for growth.

ORTHODONTIC & CLINICALLY TESTED &

A thin, concave shape that points upwards:
leaves room for the natural position of the tongue.

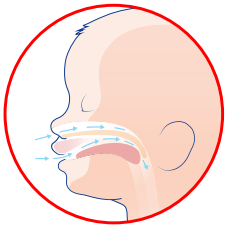

Lateral curves:
evenly distributes tongue pressure across the palate, allowing it to form correctly.

Special tiny ridges:
mimic the natural ridges of the palate, and serve as a point of reference to guide the tongue into the correct position

SUPPORTS CORRECT BREATHING.

The exclusive shape:

- **helps with physiological breathing.**
  By keeping the tongue in its natural position, it helps your baby breathe naturally, which is especially important during sleep.

Mouth breathing:
the tongue may relax in a retreated position.

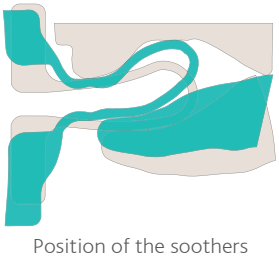

Physiological breathing with PhysioForma®:
the tongue is positioned forward and upward to maintain a natural open

- **provides the right stimulus for the development of the mouth and palate.**
  Stimulates the muscles of the mouth and encourages the correct functioning of the tongue and mouth.

A PHYSIOLOGICAL SHAPE BASED ON THE SHAPE OF THE BABY'S MOUTH

Studying the size and anatomy of soothers of different shapes has shown that:

- the PhysioForma® soother adheres perfectly to the palate and positions the tongue forward and upward resulting in the physiological opening of the respiratory tract
- the classic soother doesn't adhere perfectly to the palate and the tongue is positioned lower creating a non-physiological condition

Position of the soothers in comparison

ONLY CHICCO IS PHYSIOFORMA®.

Chicco selected PhysioForma® because it is the physiological shape suits the baby's mouth, helps with proper breathing and encourages natural orthodontic development.
PhysioForma® is present on all Chicco natural rubber and silicone soothers.

A SINGLE SHAPE WITH LOTS OF VARIETY.

	0-6 M	6-16 M	16-36 M
PhysioForma® Soft All soft, delicate on baby's face			
PhysioForma® Micrò Light and small			
PhysioForma® Light Extra lightweight

16-36

PHYSIOFORMA Soft

Completely soft, perfect night and day.
Available in rubber and in transparent coloured silicone.

HYGIENIC SILICONE 100% SOFT SENSE

SILICONE
Hygienic and non-deforming material, the exclusive Soft Sense finish makes it soft and silky.
Proved and loved by babies!*

CAUCCIÙ - LATEX 100% NATURAL SENSE

LATEX
Durable and elastic material, provides a pleasant Natural Sense texture.

WHY CHOOSE:

EXTRA SOFT AND GENTLE

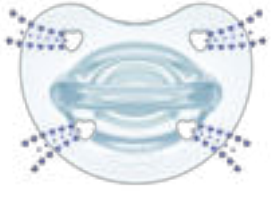

One piece construction, it's completely soft and does not bother the baby even when he is sleeping.

BREAST-LIKE BASE

It allows the lips to rest comfortably.

VENTILATION HOLES

They allow air circulation, preventing the gathering of saliva.

*(89% of babies accepted the Chicco soother. Tested on 150 children, Italy 2014).

TEETHER

Right from his very first few months, baby's mouth has a range of very different needs. Chicco has designed a complete range of products to meet the individual needs of babies during the various teething phases (2m+ chewing, 4m+ refreshing, 6m+ stimulating). Chicco's teethers provide the perfect solution for each phase of teething. The growth phase which inspired the entire range is shown on the packaging.

SILICONE TEETHING RING

(2 PCS - GRAPE AND LEMON)

ANTI DARKNESS LIGHTS

REF 00009827000000
Inner box 4 pcs

EAN CODE 8058664110582

NEW

Some psychological studies have shown the importance of colours and their effects on children. Already in the first months of life, babies have a preference for certain colours, like red, blue and purple. Their colour contrast attract their attention most. The use of a flashing light encourages the child's active participation at any age. The recommended position for placing the light source is behind the baby's cot.

MAGIC OWL

The Magic Owl is designed to stimulate the baby with lights and sounds. With 5 light effects combined with different melodies and soothing sounds of nature. The Owl reassures and cuddles the baby in a calm, peacefully and relaxing atmosphere. From birth it is important to establish a pleasant and repetitive bedtime and wakeup ritual. Its exclusive shape allows the Magic Owl to swing gently, while its practical carry-handle makes it easy for your child to carry it around at all times.

ANTI DARKNESS LIGHTS

During the first weeks of life, light plays an important role in synchronising the biological clock and, therefore, the new-born's sleep-wake rhythm. The alternation of light and darkness facilitates the settling of this rhythm. Keep the baby room dark and quiet during sleep time. A soft, low intensity light, positioned out of the direct line of the baby's sight, will reassure him if he wakes up.

NIGHT LIGHT

The Night Light projects a soft light that reassure baby without disturbing its sleep. It uses very little electricity (1 W) and can be plugged directly into the mains socket.

PILLOWS

0+

According to international medical recommendations, the supine position is the most suitable for your child.
Chicco has created two cushions, one for the cradle and one for the cot, perfect for resting in this position.

AIRFEELING
SOFT AND THIN, CONCEIVED FOR CRADLE

The innovative material reduces the pressure on your child's head and supports it.
Airfeeling is more efficient in distributing the load evenly compared with the use of the mattress alone (Tested by researchers at the University of Pavia).
It is sensitive to body temperature: it adapts to shape of baby's head distributing weight evenly.
Washable at 40°.

Pillow case composition: 100% cotton.
Padding composition: 100% polyurethane foam (memory foam)
Dimensions: 22x30x2cm

WEANING

CUPS

Allies of the development to conquer autonomy.
The new Chicco cup line helps the baby to easily and naturally drink, step by step during his growth with practical, specific solutions, stimulating him to develop new skills and respecting his abilities and preferences.

THE CUPS FOR ALL AGES & STAGES

3-4 MONTHS

The child enters a **TRANSITION PHASE**, during which he tends to replicate the motor pattern of suckling.

Several **ANATOMICAL, NEUROLOGICAL AND GASTROINTESTINAL CHANGES** occur, such as:

- Assumption of the upright posture
- Appearance of the first teeth
- Development of general sensory motor functions and transition, from suckling to sucking.

6-9 MONTHS

12+

All phonoarticular organs develop. **THE CHILD ACHIEVES COORDINATION BETWEEN SWALLOWING AND BREATHING DURING DRINKING**, learning how to adjust liquid flows.

The child is more active, he moves around and plays, **REQUIRING PROPER HYDRATION ESPECIALLY OUTDOORS.**

The child begins to learn **TO DRINK BY SUCKING FROM A STRAW.**

14+

>24 MONTHS

The child can drink and eat independently.

NEW DECO

TRANSITION CUP

4+

Ideal for the gradual, smooth and easy transition from breast or bottle to the first cup.

PERFECT CUP

Perfect for learning to drink
from a glass without spills.

200 ml | 0% BPA*

* In accordance with legislation in force.

WHY CHOOSE:

360° lip-activated silicone membrane promotes independent drinking, by releasing liquids when baby's lip is pressed against the rim, while staying spill-resistant.

Features a clear silicone membrane so baby can see liquid coming towards it and he learns how to decode this input.

Removable membrane for free flow open cup training, with or without the handles as a real glass.

BATHTIME AND SKIN CARE

Natural SENSATION

BABY SKIN IS SENSITIVE AND DELICATE, *Naturally...*

Skin development starts during the first months of pregnancy and continues during the first years of baby's life.

UNIQUE CHARACTERISTICS

At birth the skin is naturally fragile and delicate. There are three main differences compared to adult skin:

1

THINNER

The skin is thinner hence **vulnerable** and **three-fold more permeable to foreign substances** than in the adult.

2

DRYER

The skin produces a smaller quantity of lipid and the mechanism to regulate water balance is not yet fully developed so the skin is **dryer and dehydrated**.

3

EASILY IRRITATED

At birth the less acidic pH of infant skin is less effective against possible irritations.

NATURAL PROTECTION

During the last quarter of pregnancy the skin is protected by the "vernix caseosa", a thin white-yellowish layer made up of water, waxes and fatty substances with a protective function. This natural protection peels off during the first days of life.

APPROVED BY MUMS 97%*

JUST WHAT HIS SKIN NEEDS

Chicco Natural Sensation is the new line studied to follow baby's skin natural development process, as in mother's belly.

All formulas are inspired by the vernix caseosa composition, the natural protection during pregnancy, to cleanse, protect and nurture his skin, containing only what he needs.

WHY CHOOSE:

NATURAL AND ACTIVE INGREDIENTS

Selected for their specific properties, with a high toxicological safety profile.

HIGH TESTED TOLERABILITY

Tested under medical supervision by well-known independent institutes to ascertain their **tolerability** and **efficacy with very positive results.**

EXTRA GENTLE FORMULAS

0%

All formulas are studied respecting baby's delicate skin. No Parabens, phenoxyethanol, colouring and alcohol. Respects pH.

APPROVED BY DERMATOLOGISTS AND PAEDIATRICIANS
IDEAL TO USE RIGHT FROM BIRTH

*Clinical tests under medical supervision on 60 babies for 4 weeks on three products – bath oil, body lotion and nappy cream.

Natural SENSATION

0+

BATH OIL

It cleanses baby skin by **affinity** without altering the hydrolipidic film: an **extra gentle action** compared to common cleanser.

Ultra nourishing formula ideal also on **very dry skin.**

Also suitable for cleansing **newborn hair.**

Use **diluted** in bath water or **directly apply on the skin** with a cotton pad. **Rinse free.**

Sweet Almond Oil: lenitive and elasticising action
Vitamin E: moisturising and protective action

22% more hydration from the very first bath, with a long lasting effect.
Strengthens the skin natural defences from the very first use.

Natural SENSATION

NAPPY CREAM 4IN1

The fragrance-free formula ensures an extra gentle action. Effectiveness is guaranteed by four actions:

1. PREVENTS irritation and redness caused by external agents.

2. PROTECTS the skin and strengthens the natural skin defences by creating a barrier effect while leaving it free to breathe.

3. SOOTHES from the very first use, restoring the skin's protective barrier.

4. REPAIRS the skin, promoting the natural skin barrier regeneration process.

10% Zinc Oxide: lenitive action
Shea Butter: skin barrier regenerating action
Panthenol (Pro-vitamin B5): moisturising, emollient and lenitive action
Vitamin E: lenitive and protective action

Fights the onset of rashes and reddening, maintaining the skin barrier intact.
Long lasting protection between nappy changes

CLEANING AND CARE FOR LITTLE ONES

Chicco's hygiene range offers an extensive selection of products for cleaning and taking care of little ones. Each products, with colours and shapes designed for babies, makes the daily tasks quicker and easier, turning them into a time for pampering and fun.

BATH TUB

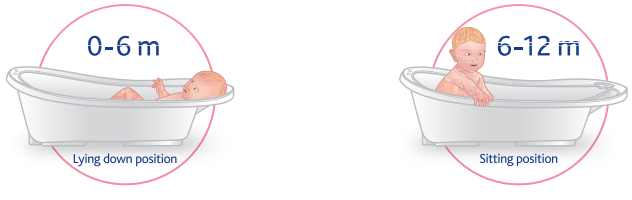

Specially designed for baby's bath, from the first days of life to a year old. The ergonomic shape adapts to the child's growth.

A safety stopper between the legs supports the baby to avoid sliding in the water.

It has a built-in cap for easy emptying and two spaces to hold soap, sponges or other accessories. It is easy to clean and to move.

It is non-bulky (dimensions: 46 x 86 x 22 cm).

It offers two washing positions: with baby lying down, from birth to six months, and then seated, from 6 to 12 months.

NASAL HYGIENE

0+

PHYSIOCLEAN

Nasal cleansing is very important, particularly for newborns: in the first months of life, a baby breathes predominantly through the nose, and cannot blow it by himself.
Having a blocked nose affects sleep, feeding, general well-being of baby and family.
If your baby's nose is congested, it makes it harder for him to eat, drink and sleep.
Chicco's full range of nasal hygiene products for daily use offers the perfect solution.

NASAL ASPIRATOR

With its practical resealable bag, the nasal aspirator provides an immediate solution to keep little noses clear, eliminating nasal secretions and allowing baby to breathe freely.
Easy to use thanks to its ergonomic shape with grip.
The disposable nozzles in soft, flexible material are designed specifically for children's delicate, sensitive noses, and include a pre-inserted absorbent filter for maximum hygiene.
It is a medical device.

REF 00004904000000
Inner box 6 pcs

EAN CODE 8003670823537

TRADITIONAL NASAL ASPIRATOR

Opening compartment containing the physiological solution.

ORAL CARE

GENTLE TODAY, HEALTY TOMORROW
The complete range of Chicco products for effective and safe care of baby's gums and teeth from day one.
All products are developed in collaboration with experts and with the Chicco Baby Research Center,
in order to meet all the specific needs of child as he grows up.
Babies are introduced to oral hygiene in 4 steps:

1
START TO TAKE CARE OF BABY'S ORAL HYGIENE

BEFORE TEETHING

During this time, baby's gums need to be cleaned after each feed.
In addition to establishing a good hygiene routine, this will also help your little one to get used to daily cleaning, before the appearance of his first teeth.

2
START DEVELOPING THE HABIT OF DENTAL HYGIENE

DURING TEETH ERUPTION

The phase just before dental eruption occurs is characterised by small but annoying problems, such as swollen gums or irritation. During this stage, babies feel an intense need to bite and relax, using a teether.

3
FIRST MILK TEETH

AFTER TEETHING

The first milk teeth appear at around six months. Parents should try to make brushing baby's teeth into a fun routine.

4
MILK TEETH

TEETHING

Whole teething is completed at around 24th months of life, with the formation of 20 teeth. Deciduous teeth are very different from permanent ones: the enamel of primary teeth is more thin and permeable and has less dense structure. It's very important to don't underestimate temporary nature of deciduous teeth: they ensure the right eruption of permanent ones.

TOOTHBRUSH

0+

Paediatricians recommend cleaning baby's gums after each feed so as to remove any bacteria that may be present.

BEGINNING SET

Includes Chicco Finger Toothbrush and Gum Gel.

Suitable for soothing discomfort linked to the eruption of baby's first teeth.
Sanitising action: It cleans and sanitises the oral mucosa. Contains Xylitol, known for its antibacterial action.
Soothing, refreshing action: gel formula, chamomile provides relief to irritated gums.
It is safe to swallow and without flavour.

The silicone finger toothbrush is a useful tool for the proper application of Chicco's gum gel.
The soft bristles allow parents to safely massage reddened gums and baby's first teeth.

WELLBEING

0+

BABIES AND FEVER

FEVER: WHAT IS IT?

It is the increase in body temperature above normal range, usually between 36.5°and 37.5°C (it differs from person to person).
Body temperature is usually at its lowest in the morning and slightly higher during the afternoon; it also increases in some everyday situations, such as during intense physical effort.

HOW CAN I MEASURE IT?

Taking babies' temperature is not always as easy as it seems!
It is essential to use a tailored thermometer, with features and technologies developed to make it as non-invasive as possible. Infrared or digital thermometers are the most suitable to take newborns and babies' temperature , as they can measure temperature of various parts of the body. Here's how to do:

DIGITAL MEASUREMENT

Axillary measurement. This is the method recommended for babies, also for newborns , and requires a specific thermometer.
Skin temperature is influenced by external factors and the positioning of the instrument; therefore, you must ensure that the skin under the armpit is thoroughly dry and that you keep the baby still whilst taking the measurement.

Rectal measurement. Use a digital thermometer with a flexible probe. Lubricate the tip with vaseline or olive oil and whilst taking the temperature, try to hold the baby still. The rectal temperature is half a degree higher than the axillary readings on average.

INFRARED MEASUREMENT

Forehead measurement. To obtain reliable results, you must use this quick, handy tool accurately and correctly. Wait about 20-25 minutes to let the thermometer adapt to the ambient temperature. If you want to take the temperature again you should wait at least 5 minutes without holding the thermometer in your hand. Compare the ambient and baby's readings in order to evaluate the difference . Forehead measurement readings are half a degree higher than axillary readings on average.

Ear measurement. This kind of measurement requires an infrared thermometer. The sensor should be positioned in the ear channel: you will need to "stretch" the auricle. Remember that otitis or ear wax can alter values. Use a probe cover when using this type of thermometer. Ear measurement readings are half a degree higher than axillary readings on average.

DID YOU KNOW THAT ...

Different measuring sites will produce different readings: it is hard to make correlations which are significant and valid for each person with no bias. Therefore body temperature taken orally will be different from an underarm measurement and it is wrong to compare the two.

TYPE OF MEASUREMENT	NORMAL TEMPERATURE	FEVER TEMPERATURE
RECTAL	36,6 °C	38,0 °C
AXILLARY	34,7 °C	37,3 °C
FOREHEAD	35,5 °C	37,5 °C
EAR	35,8 °C	38,0 °C

THERMO FAMILY

A new thermometer to be always connected and monitor baby's fever everywhere.

Thermo Family is an infrared thermometer ideal to for measuring the foreheads temperature. Measure of the baby and can be synchronized with the smartphone or can be used as a normal thermometer.
Thanks to the dedicated APP Chicco Baby Universe you can monitor the fever, view data, save and share them safely with whoever you choose.

INSTANT AND FAST

The infrared technology allows you to measure the temperature of the baby simply in just 1 second

3 IN 1: MULTI FUNCTION

Thermo Family measures fever and more. It can also be used to identify the temperature of objects and liquids.

The **APP Chicco Baby Universe** records and shares all the values and measurements to create a fever diary, which is always available on your smartphone. A simple interface that allows:

1. Save the values automatically
2. Monitor the temperature trends
3. Take note about symptoms and drugs
4. Share information safely with whoever you choose

Thanks to the multi-profile function every member of the family has its own dedicated profile that can be consulted at any time.

BABY MONITOR

Chicco Baby Monitors are a very useful tool to help mums and dads to stay close to their baby.

Chicco's research is focused on remaining up to date with evolving trends to meet parents' needs.

Compactness, attractive design, ease of use and innovation are the characteristics of Chicco Baby Monitors.

Chicco Baby Monitor range uses DECT and digital technology to be in the forefront of wireless communication.

The parent unit communicates only with the baby unit with which is associated to: your privacy is guaranteed.
There is no audio-video interference caused by other devices in the home or nearly.
The two units can communicate at a great distance.

PROTECTION AT HOME

6+

When a baby begins to stand and crawl, and then walk,
he becomes more and more curious about everything around him.
But his curiosity can sometimes be dangerous. Babies are unpredictable and fast,
and a moment of distraction may be enough for him to run serious risks for its safety.
For this reason, Chicco has created a complete range of safety products to avoid risks at home and on the go.

AT HOME

Home is where a child feels the most protected and loved by his family,
but sometimes a parent's love alone is not enough to protect him.
Therefore, it is really important to think about baby's safety,
using products that provide a safe home.

SAFETY ACCESSORIES

MULTI–LOCK

The Multi-lock is a safety device.
It prevents your child from opening the fridge, WC cover, wardrobes, drawers, etc.

INSECT PROTECTION

NATURAL PROTECTION IDEAL FOR THE LITTLE ONES

The majority of products on the market contain active ingredients of chemical origin.
However, baby's delicate skin - from the very first months - needs to be protected
from external agents with special products which are formulated specifically
for sensitive skins, and ideally, with active ingredients of natural origin.

100% NATURAL PROTECTION

Chicco Cosmetic Line refreshes, moisturizes
and naturally protects babies skin without using chemical repellents.
Thanks to Crabwood and Melissa oils, well-known as natural repellents,
the baby's skin is naturally refreshed and protected also against mosquitoes.
Moreover, all products are without synthetic perfume and they are characterized
by a natural and delicate fragrance due to the Melissa oil.

EXTRA GENTLE PROTECTION

All the products of the Chicco Cosmetic Line are dermatologically tested on sensitive skins.
They are safe and suitable even for the most delicate skins of the little ones.
All the formulations are free from: alcohol, coloring, parabens, EDTA, SLES, Phenoxyethanol, PEG,
Derivatives of Petroleum, Silicons, Mineral oils.

DAY AND NIGHT PROTECTION

The exclusive formula of the Chicco Cosmetic Line
works night and day, providing gentle protection from the most common types
of mosquitoes, such as the Asian Tiger mosquito (Aedes Albopictus).

2+

LOTIONS

PREGNANCY AND POST-PARTUM

BECOMING A MUM

During pregnancy and in the postpartum period, a mother's body changes continuously.
As early as in the first months, it is advisable to wear maternity undergarments that conform to and comfortably help to support the abdomen, breasts and back.
In these delicate phases of change, practicality and comfort are fundamental.

SPECIFIC NEEDS

DURING PREGNANCY

The future mother's figure becomes softer.
The breast grows larger and heavier and the abdomen expands and begins to carry weight, putting a strain on the back.

WHAT IS NEEDED

A non-constricting maternity bra designed to conforms to the progressive weight increase of the breast; freedom of movement and maximum comfort must always be guaranteed.

Underwear that can properly support the abdomen and reduce discomfort due to pressure on the bladder.

POSTPARTUM

Right after giving birth, the body tends to return to normal and provide nutrition to the newborn.
The breasts are heavy and voluminous for breastfeeding.
The abdomen and the rest of the body recover their original shapes, while the muscle and bone structure progressively readjust.

WHAT IS NEEDED

A specific bra designed to correctly support the breast weight and allow breastfeeding in a practical, easy and safe manner.

Functional underwear, to support and maintain the abdomen for a natural recovery of their physical shape.

MATERNITY AND NURSING UNDERWEAR

Specific high quality products for maximum comfort and practicality.
A line designed to accompany the mother both during pregnancy and postpartum.

MATERNITY

MATERNITY BRA

Conforms to the natural development of the breasts.

MATERNITY SUPPORT BELT AND GIRDLE

They help to properly support the abdomen and lumbar regions of the back.

NURSING

NURSING BRA

Allows for discreet and practical breastfeeding.

SUPPORT BELT AND GIRDLES

Help to support and compress the abdomen regions without constricting. Recovering the woman's natural physical shape easier.

POSTPARTUM 3-LAYER SANITARY TOWELS

3-layer postpartum pads were specially designed for the postpartum period.
They are particularly long and wide to guarantee maximum protection.
Thanks to the special 3-layer structure, they are very absorbent and comfortable.
You can wear them with the postpartum disposable underwear.
30-piece package, one size fits all.

Chicco Nursery keeps working on the continuous evolution of children's safety regulations, which in europe regulate the design and production of nursery products. The constant technological development may therefore oblige us to modify our products during the period of validity of the catalogue. The details and indications provided are therefore non-binding. Furthermore, due to printing process, colours and fabric might result different compared to the real items. Availability of the products in this catalogue is subject, at all times, to our manufacturing capacity. Regular supply of products is therefore dependant on manufacturing capacities.
