

MAINSTREAM COMPUTING FOR A VARIETY OF BUSINESS USES

Lenovo V Series desktops offer exceptional value for money, and are available in a range of sizes and performance configurations to meet the varying needs of your workforce.

Lenovo V50s 07IMB

Smarter technology for all

Lenovo

This compact desktop is much smaller than a regular tower, but retains many of the upgrade and performance capabilities, including two PCIe expansion slots. Completely re-designed with an Iron Grey finish, it has front air vents for improved air circulation and a new cooling system that can boost performance or reduce fan noise in different scenarios.

REASONS TO BUY

Convenient features include 4 front-mounted USB ports, a specially engineered BIOS that improves cold boot times by at least 5 seconds (even on SSD), and the ability to power on the device using the keyboard – useful if the desktop is under a desk and out of reach.

Configure for the needs of different users and budgets with support for the latest Intel processors with up to 10 cores, an optional graphics card and up to 2 onboard storage drives.

Engineered for reduced power consumption and near-silent operation; EPEAT Silver, Energy Star 8.0 and TUV Low Noise certified.
