- Surround lighting effects
- High-quality, versatile design
- Wash the wall with a gradient of light
- Two sizes for a perfect fit
- Hue Sync mobile app and Hue Bridge required

Issue date: 2026-08-05 Version: 0.896

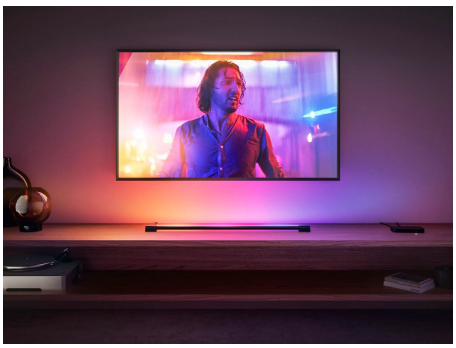

Highlights

Game Changing Home Entertainment

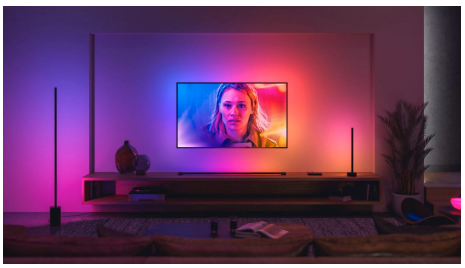

Philips Hue is the only smart lighting brand to easily sync your color-capable smart lights with movies and video games for thrilling home entertainment. The game-changing Hue Sync technology captures the content you're watching or playing and translates it into an immediate light script to create a colorful full-room experience.

Seamlessly blend colors

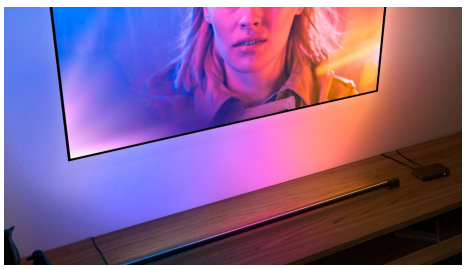

Get a seamless blend of multiple colors of light — at the same time — in a single lamp. The colors flow together naturally, casting light against the wall to showcase a unique effect behind your TV.

Surround lighting effects

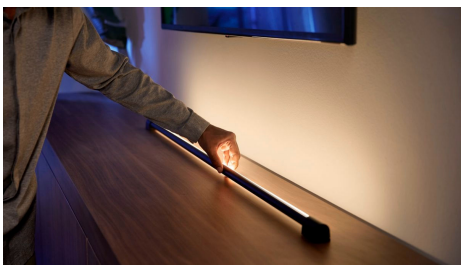

Experience the magic of surround lighting! The Play gradient light tube reacts to the content on the entire screen in real time, creating a captivating television viewing and gaming experience. Pair with other Philips Hue color-capable lights for a truly immersive effect.Requires the Philips Hue Play HDMI sync box and Hue Bridge (sold separately).

High-quality, versatile design

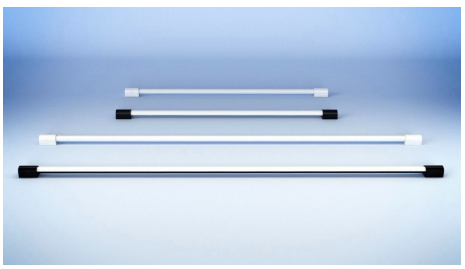

Made with sturdy, high-quality materials, the Play gradient light tube can be laid flat at the base of the TV or even mounted to the underside of a TV stand or a shelf above. No matter the location, it shines a bright, bold gradient of colorful light.

Wash the wall with a gradient of light

Rotate the light tube 340 degrees to direct its blend of colorful light anywhere you'd like, creating a wash of indirect lighting without any glare on the TV itself.

Two sizes for a perfect fit

The Play gradient light tube comes in two sizes. The compact light tube is recommended for TVs up to 55 inches, while the large light tube is recommended for 60-inch and larger TVs.

Hue Sync mobile app and Hue Bridge required

The Philips Hue Play gradient light tube requires the Philips Hue Play HDMI sync box, Hue Sync mobile app, and a Hue Bridge. The Bridge also allows you to add up to 50 lights and accessories throughout your entire home, create timers and routines, and control your lights from anywhere — inside or outside your home — with the Hue app. The Philips Hue Play HDMI sync box and Hue Bridge are sold separately.
