Highlights

Bad/alkaline battery detection
This feature will notify when a bad or alkaline battery is inserted, hence ensuring optimum safety

Hi Speed power charging
The 1 hour Charger enables you to be fully up and running with maximum power in as little as approximately 1 hour.

Reverse polarity protection
Reverse polarity protection ensures correct battery installation in the charger preventing the batteries from being charged or damaged.

Trickle charging
The Travel charger is a smart charger equipped with a trickle charging feature that adjusts the charging rate to keep the battery fully charged and ready to use.

World plugs included
Two included adapters that can be connected to the original power plug allow you to use the charger in countries that have UK or US power outlets.

LED light indicates charging
The LED light will turn on to indicate when charging is in progress, off when charging has been completed and will flash if a bad battery is inserted
