

Empowering the modern workforce with a streamlined desktop experience

The compact M7 Series Tiny desktops boast a small footprint yet deliver superior performance. Equipped with powerful processors, ample memory, and SSD storage, they push the boundaries of desktop computing, enabling greater productivity.

ThinkCentre M70q Gen 2

Whether working from a home office or a traditional workspace, business professionals will appreciate the power and flexibility this micro-desktop offers. No bigger than a book, it can fit almost anywhere – yet delivers robust performance with up to 11th Gen Intel Core i9 processors. Easy to deploy, manage and upgrade with tool-less access to the SSD and memory module. It also comes with optional WiFi 6 technology, which can enable faster internet speeds with compatible routers.

For added flexibility, users can connect two 4K displays using the onboard DisplayPort and HDMI ports, or up to three displays if a 3rd video connector is configured. There's also intelligent cooling that allows a choice between two modes – best performance mode for extreme cooling and best experience for low-noise cooling.

Extensive security features include TPM chip encryption, BIOS-based Smart USB protection that disables data transfers via USB ports, and a Kensington lock slot to secure the device against physical theft.

96% smaller than a traditional desktop - fits on or under a desk, mounted behind a monitor or on desk wall.
